

### Science (086) Class X Sample Question Paper 2022

#### Max. Marks 80

#### Time Allowed: 3 hours

#### **General Instructions:**

- i. This question paper consists of 39 questions in 5 sections.
- *ii.* All questions are compulsory. However, an internal choice is provided in some questions. A student is expected to attem**ph**ly one of these questions.
- iii. Section Aconsists of 20 objective type questions carrying 1 mark each.
- *iv.* **Section B**consists of 6 Very Short questions carrying 02 marks each. Answers to these questions should in the range of 30 to 50 words.
- v. **Section C**consistsof 7 Short Answer type questions carrying 03 marks each. Answers to thes questions should in the range of 50 to 80 words
- vi. Section D consists of 3 Long Answer type questions carrying 05 marks danswer to these questions should be in the range of 80 to Mords.
- vii. SectiorE consists of 3 sourcebased/casebased units of assessment of 04 marks each with antaba

# **LEARNING FOR CLASS 10 BOARDS IS NOW MADE SIMPLER**

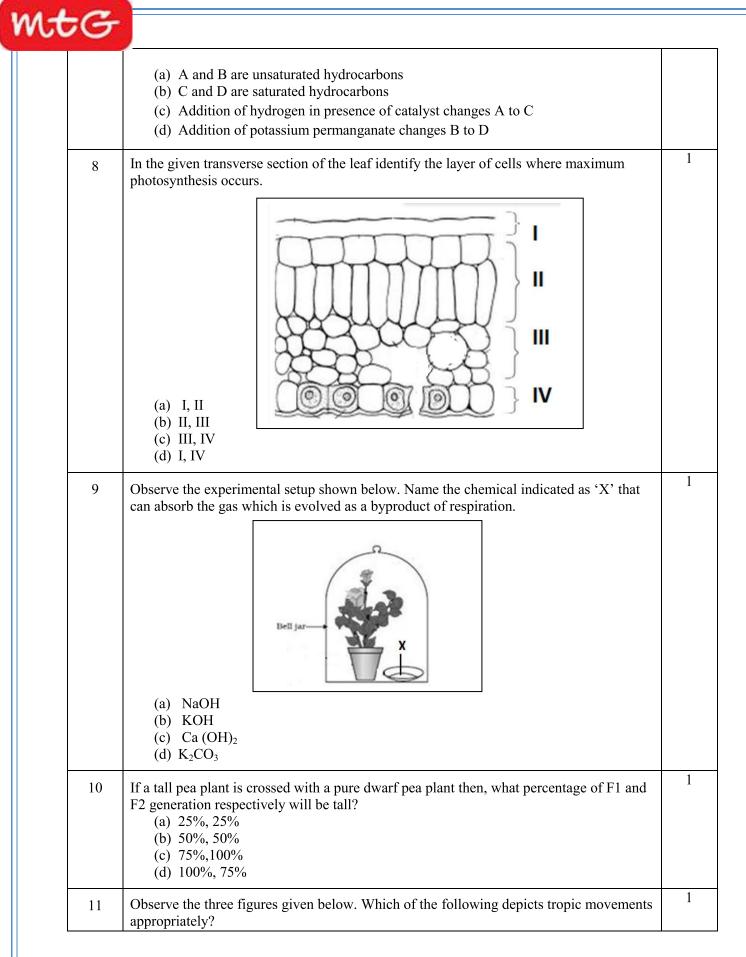

### with MTG Books For CBSE Boards!

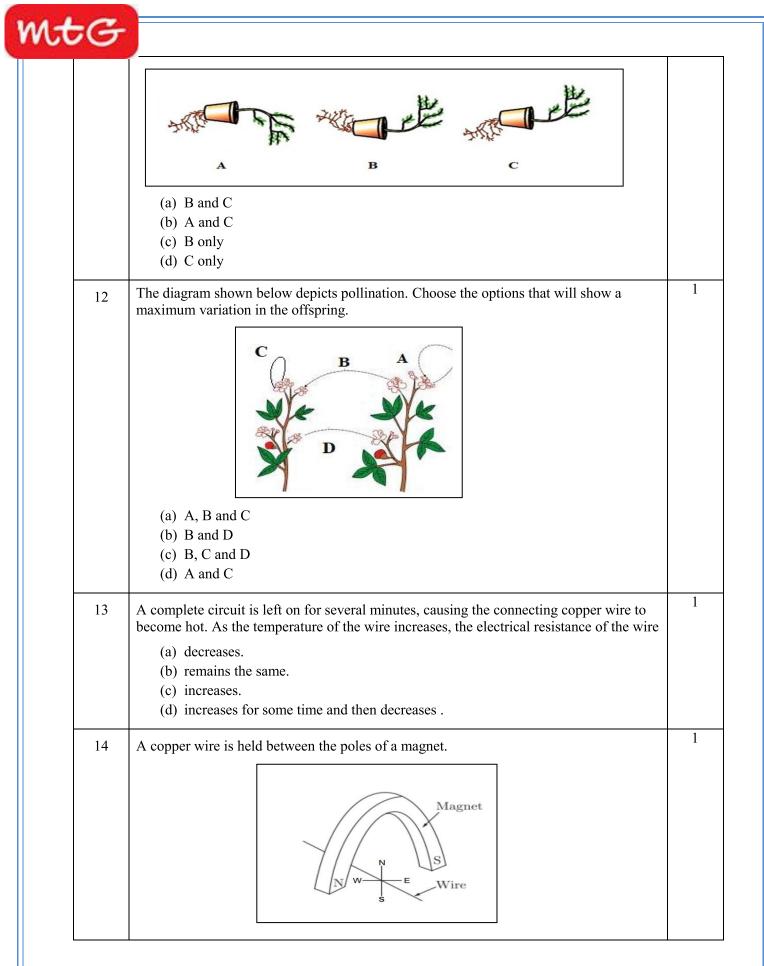

## **Study Resources That Covers:**

- ✓ Complete Theory From Core
- ✓ Topic-wise Practice for Exhaustive Grip on Concepts
- NCERT in-text and Exemplar Problems
- ✓ Previous Years' Papers and
- ✓ Questions Based On The Latest Syllabus and Pattern

	(b) Ravi kept a book at a distance of 10 cm from the eyes of his friend Hari. Hari is not able to read anything written in the book. Give reasons for this?	
32	<ul> <li>A student fixes a white sheet of paper on a drawing board. He places a bar magnet in the centre and sprinkles some iron filings uniformly around the bar magnet. Then he taps gently and observes that iron filings arrange themselves in a certain pattern.</li> <li>(a) Why do iron filings arrange themselves in a particular pattern?</li> <li>(b) Which physical quantity is indicated by the pattern of field lines around the bar magnet?</li> <li>(c) State any two properties of magnetic field lines.</li> <li>OR</li> <li>A compass needle is placed near a current carrying wire. State your observations for the following cases and give reasons for the same in each case-</li> <li>(a) Magnitude of electric current in wire is increased.</li> <li>(b) The compass needle is displaced away from the wire.</li> </ul>	3
33	Why is damage to the ozone layer a cause for concern? What are its causes and what steps are being taken to limit this damage?	3
	<b>SECTION - D</b> Q.no. 34 to 36 are Long answer questions.	
34	Shristi heated Ethanol with a compound A in presence of a few drops of concentrated sulphuric acid and observed a sweet smelling compound B is formed. When B is treated with sodium hydroxide it gives back Ethanol and a compound C.	5
	<ul> <li>(a) Identify A and C</li> <li>(b) Give one use each of compounds A and B.</li> <li>(c) Write the chemical reactions involved and name the reactions.</li> </ul>	
	OR	
	<ul> <li>(a) What is the role of concentrated Sulphuric acid when it is heated with Ethanol at 443 K. Give the reaction involved.</li> <li>(b) Reshu by mistake forgot to label the two test tubes containing Ethanol and Ethanoic acid. Suggest an experiment to identify the substances correctly? Illustrate the reactions with the help of chemical equations</li> </ul>	
35	<ul> <li>(a) Why is it not possible to reconstruct the whole organism from a fragment in complex multicellular organisms?</li> <li>(b) Sexual maturation of reproductive tissues and organs are necessary link for reproduction. Elucidate.</li> </ul>	5
	OR	
	<ul><li>(a) How are variations useful for species if there is drastic alteration in the niches?</li><li>(b) Explain how the uterus and placenta provide necessary conditions for proper growth and development of the embryo after implantation?</li></ul>

After a f ses were measured. The tab	and air on iron object under ass of each object before few days, the object were ole shows their results.	4
	Student	Object	Mass of Object before Rusting in g	Mass of the coated object in g	
	Α	Nail	3.0	3.15	
	В	Thin plate	6.0	6.33	
	(b) In anoth iron nail initially	er set up the stu s coated with z acts as a physic ues to prevent 1	inc prevents rusting. They cal barrier, but an extra adv rusting even if the layer of	th zinc metal and noted that,	

tG		
	OR (b) In which of the following applications of Iron, rusting will occur most? Support your answer with valid reason. A B C D C D A C D A - Iron Bucket electroplated with Zinc B - Electricity cables having iron wires covered with aluminium C - Iron hinges on a gate D - Painted iron fence	
38	<ul> <li>Pooja has green eyes while her parents and brother have black eyes. Pooja's husband Ravi has black eyes while his mother has green eyes and father has black eyes.</li> <li>(a) On the basis of the above given information, is the green eye colour a dominant or recessive trait? Justify your answer.</li> <li>(b) What is the possible genetic makeup of Pooja's brother's eye colour?</li> <li>(c) What is the probability that the offspring of Pooja and Ravi will have green eyes? Also, show the inheritance of eye colour in the offspring with the help of a suitable cross.</li> <li>(d) 50% of the offspring of Pooja's brother are green eyed. With help of cross show how this is possible.</li> </ul>	4
39	Image: A state of the specialized slide projector. Slides are small projection, since they have a very high resolution and a high image quality. There is a tray where the slides are to be put into a particular orientation so that the viewers can see the enlarged erect images of the transparent slides. This means that the slides will have to be inserted upside down in the projector tray.To show her students the images of insects that she investigated in the lab, Mrs. Iyer brought a slide projector. Her slide projector produced a 500 times enlarged and inverted image of a slide on a screen 10 m away.	4

ttG.	
	<ul><li>(a) Based on the text and data given in the above paragraph, what kind of lens must the slide projector have?</li></ul>
	(b) If v is the symbol used for image distance and u for object distance then with one reason state what will be the sign for $\frac{v}{u}$ in the given case?
	(c) A slide projector has a convex lens with a focal length of 20 cm. The slide is placed upside down 21 cm from the lens. How far away should the screen
	be placed from the slide projector's lens so that the slide is in focus? <b>OR</b>
	(c)When a slide is placed 15 cm behind the lens in the projector, an image is formed 3 m in front of the lens. If the focal length of the lens is 14 cm, draw a ray diagram to show image formation. (not to scale)
