## Science (086) Class X Sample Question Paper 2022-23

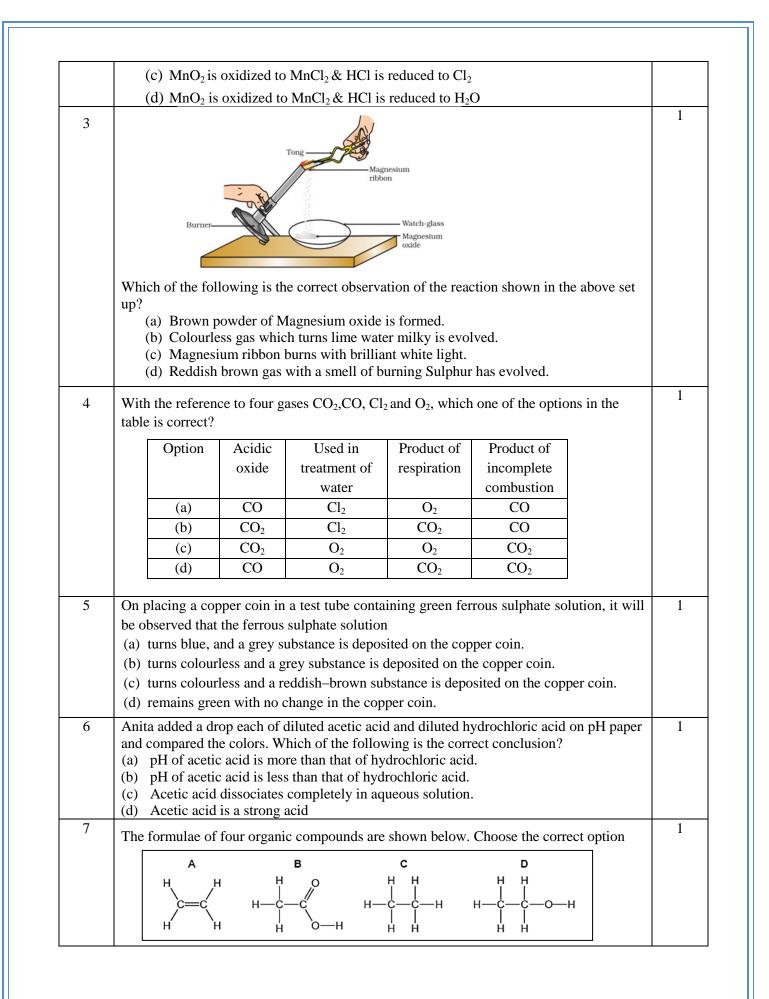

## Max. Marks: 80

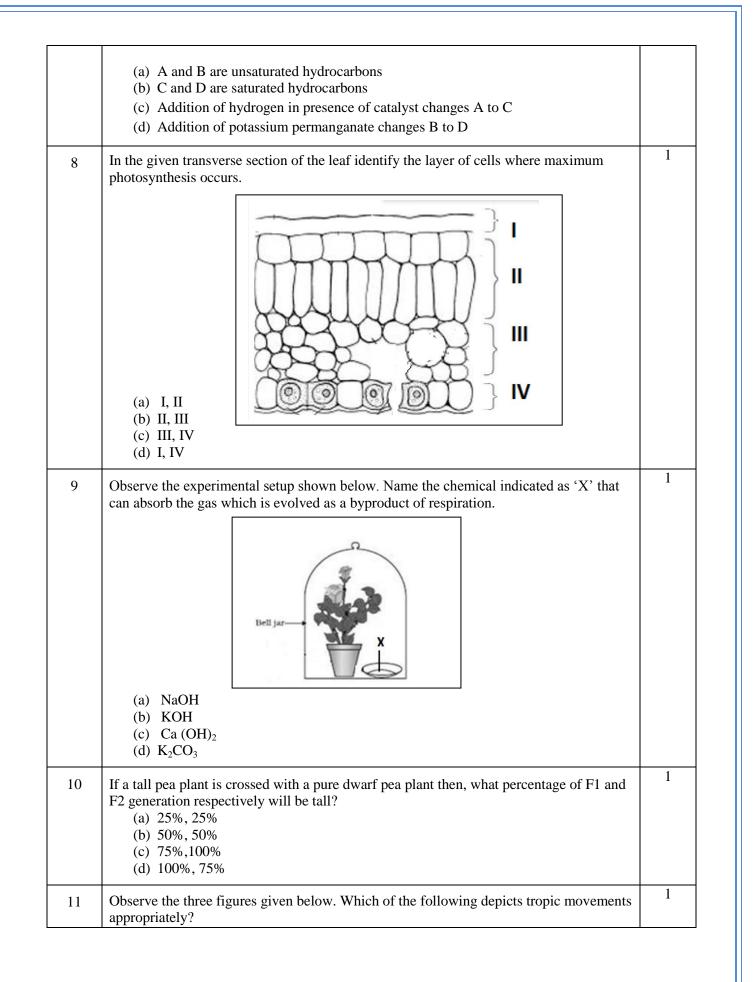

## Time Allowed: 3 hours

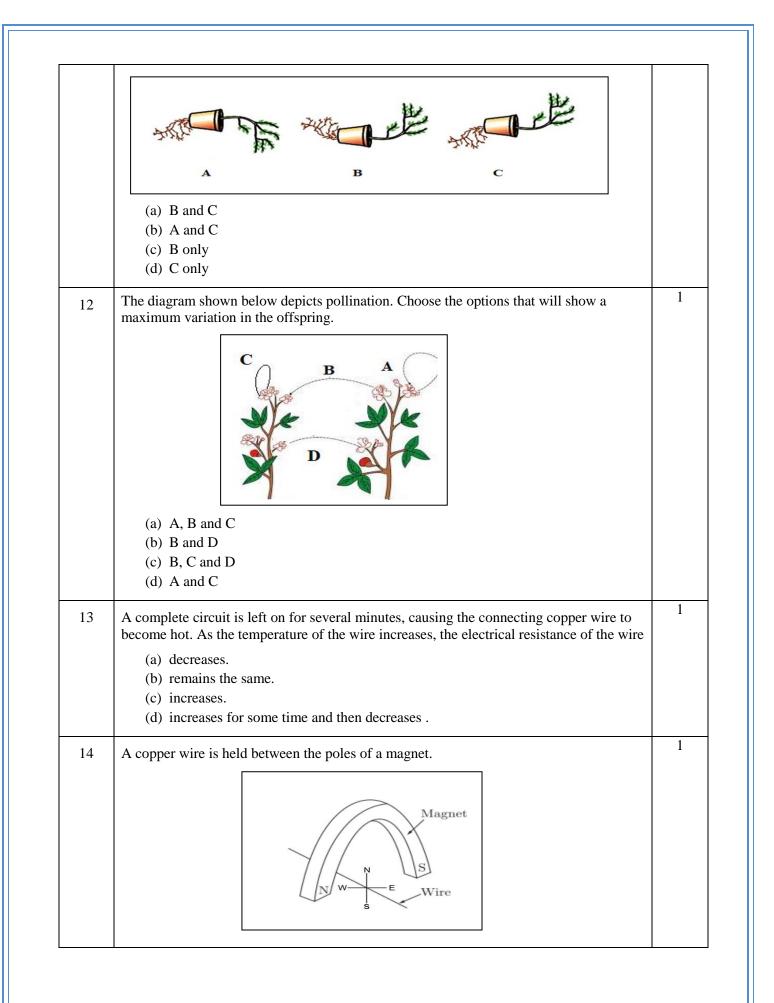

## **General Instructions:**

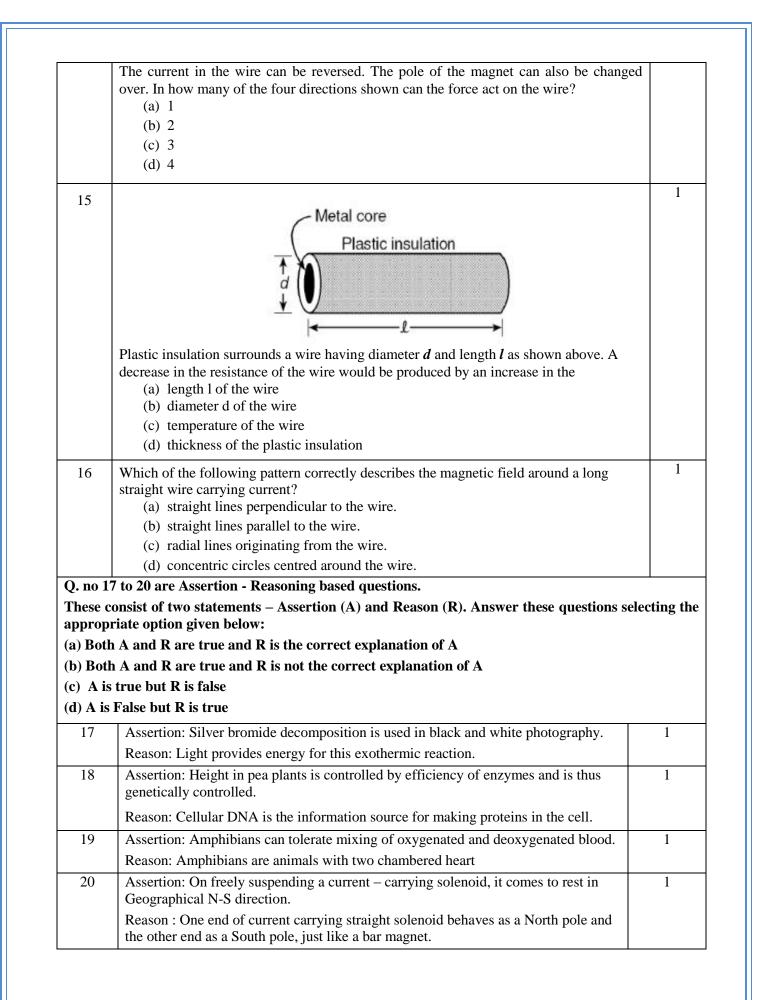

- i. This question paper consists of 39 questions in 5 sections.
- *ii.* All questions are compulsory. However, an internal choice is provided in some questions. A student is expected to attempt only one of these questions.
- iii. Section A consists of 20 objective type questions carrying 1 mark each.
- *iv.* Section B consists of 6 Very Short questions carrying 02 marks each. Answers to these questions should in the range of 30 to 50 words.
- v. Section C consists of 7 Short Answer type questions carrying 03 marks each. Answers to these questions should in the range of 50 to 80 words
- vi. Section D consists of 3 Long Answer type questions carrying 05 marks each. Answer to these questions should be in the range of 80 to 120 words.
- vii. Section E consists of 3 source-based/case-based units of assessment of 04 marks each with sub-parts.

		Q. no. 21 to 26 a	are very short answer c	questions.	
21	This solution is le precipitate forms response with the Keerti added dilu	eft exposed to air. Explain why a fai help of a chemica	The solution slowly go int white precipitate for l equation. OR	DH) <sub>2</sub> in an excess of water. es milky as a faint white rms, support your ecorded her observations	2
		Metal	Gas Evolved		
		Copper	Yes		
		Iron	Yes		
		Magnesium	No		
		Zinc	Yes		
	Select the correct involved.	t observation(s) and	d give chemical equation	on(s) of the reaction	
22	How is the mode Give four examp		g of the heart different	from reflex actions?	2
23	Patients whose g Why?	allbladder are remo	oved are recommended	to eat less oily food.	2
24				during urine formation. ter that is reabsorbed in	2
25	ra	diation from the Sun	l l l l l l l l l l l l l l l l l l l	llow light ue light	2
	-		÷ .	ain with reference to the ve the higher wavelength?	
			OR		
	-	-		am of white lightincident ht? Draw the diagram.	

	(b) Ravi kept a book at a distance of 10 cm from the eyes of his friend Hari. Hari is not able to read anything written in the book. Give reasons for this?	
32	<ul> <li>A student fixes a white sheet of paper on a drawing board. He places a bar magnet in the centre and sprinkles some iron filings uniformly around the bar magnet. Then he taps gently and observes that iron filings arrange themselves in a certain pattern.</li> <li>(a) Why do iron filings arrange themselves in a particular pattern?</li> <li>(b) Which physical quantity is indicated by the pattern of field lines around the bar magnet?</li> <li>(c) State any two properties of magnetic field lines.</li> <li>OR</li> <li>A compass needle is placed near a current carrying wire. State your observations for the following cases and give reasons for the same in each case-</li> <li>(a) Magnitude of electric current in wire is increased.</li> <li>(b) The compass needle is displaced away from the wire.</li> </ul>	3
33	Why is damage to the ozone layer a cause for concern? What are its causes and what steps are being taken to limit this damage?	3
	<b>SECTION - D</b> Q.no. 34 to 36 are Long answer questions.	
34	Shristi heated Ethanol with a compound A in presence of a few drops of concentrated sulphuric acid and observed a sweet smelling compound B is formed. When B is treated with sodium hydroxide it gives back Ethanol and a compound C. (a) Identify A and C (b) Give one use each of compounds A and B.	5
	(c) Write the chemical reactions involved and name the reactions.	
	<ul> <li>OR</li> <li>(a) What is the role of concentrated Sulphuric acid when it is heated with Ethanol at 443 K. Give the reaction involved.</li> <li>(b) Reshu by mistake forgot to label the two test tubes containing Ethanol and Ethanoic acid. Suggest an experiment to identify the substances correctly? Illustrate the reactions with the help of chemical equations</li> </ul>	
35	<ul> <li>(a) Why is it not possible to reconstruct the whole organism from a fragment in complex multicellular organisms?</li> <li>(b) Sexual maturation of reproductive tissues and organs are necessary link for reproduction. Elucidate.</li> </ul>	5
	OR	
	<ul><li>(a) How are variations useful for species if there is drastic alteration in the niches?</li><li>(b) Explain how the uterus and placenta provide necessary conditions for proper growth and development of the embryo after implantation?</li></ul>	

				bld circuit. The house shown rical connections are made.	5		
	<ul> <li>the mains is 22</li> <li>(a) What is mains?</li> <li>(b) The sprespect of space</li> <li>(c) What is</li> <li>(d) What sprespect of space</li> </ul>	A. is the mode of baces 5 and 4 tive resistances ce 5. What is the s the current in should be place s electrical app	connection to all the spectrum to all the spectrum to all the spectrum to a spectrum to a spectrum the spectrum to a spectrum	the net current coming from aces in the house from the e and spaces 3 and 2 have has a resistance double that 5. enection and the rest of the om accidental high electric			
Q.no	. 37 to 39 are ca		<b>SECTION - E</b> -based questions with 2 to vided in one of these sub-p	9 3 short sub - parts. Internal c	hoice is		
		Two students decided to investigate the effect of water and air on iron object under identical experimental conditions. They measured the mass of each object before placing it partially immersed in 10 ml of water. After a few days, the object were removed, dried and their masses were measured. The table shows their results.StudentObjectMass of Object beforeMass of the coated					
37	identical exper- placing it partia removed, dried	lecided to inves imental conditionally immersed i and their mass	ons. They measured the mann 10 ml of water. After a few were measured. The tabeland Mass of Object before	and air on iron object under ass of each object before Yew days, the object were ole shows their results. Mass of the coated	4		
	identical exper placing it partia removed, dried	lecided to inves imental conditionally immersed i and their mass Object	ons. They measured the man 10 ml of water. After a f es were measured.
